

Ingredients:

ACTIVE INGREDIENTS: coconut oil, sage oil, glycerin, sodium stearate

Product Summary

Coconut Oil Deodorant

Using natural deodorant can have several benefits. First, it is typically made with natural ingredients that are safer for your skin and body compared to traditional deodorants that may contain harmful chemicals. Natural deodorant also helps to reduce body odor by neutralizing the bacteria that causes it, rather than just masking the smell with fragrances. Additionally, many people find that natural deodorant is gentler on their skin and can help to reduce irritation and inflammation. Overall, making the switch to natural deodorant can be a healthier and more sustainable choice for both you and the environment.

Responsible Cautions

- ▶▶ Keep out of reach of children and pets.
If you are pregnant, nursing, or under a
- ▶▶ doctor's care, consult your healthcare provider prior to use.

Ingredient Highlights

Coconut Oil:

Coconut oil has many potential benefits for the skin. It is a natural moisturizer that can help to hydrate and nourish the skin. Coconut oil also contains anti-inflammatory and antioxidant properties that may help to protect the skin from damage and reduce the signs of aging. However, it is important to note that coconut oil may not be suitable for everyone, particularly those with oily or acne-prone skin. It is always best to do a patch test and consult with a dermatologist before using coconut oil on the skin.

Sage Oil:

Sage oil is an essential oil that is derived from the leaves of the sage plant. It is known for its distinct aroma and is commonly used in aromatherapy and as a natural remedy for a variety of ailments. Sage oil has been found to have antimicrobial, anti-inflammatory, and antioxidant properties, and can be used topically or inhaled to help relieve symptoms of respiratory conditions, menstrual cramps, and stress.
