

Ingredients:

12-ounce bag of ground Imperial, our Uganda Mt. Elgon light roast coffee.

Product Summary

Imperial coffee Light Roast

what is light roast coffee?
Light roast coffee refers to coffee beans that have been roasted for a relatively short period of time, resulting in a lighter color and milder flavor profile compared to darker roasts. Light roasts are typically more acidic and have a higher caffeine content than darker roasts. Some coffee drinkers prefer light roasts because they allow for the unique flavors of the specific coffee bean to shine through, while others may find them too mild and prefer a stronger, bolder taste.

About our Vendor

Our coffee is carefully curated for java lovers from all walks of life.

Our **vendors** have decades of experience working with coffee, and the passion they exude for what we produce is evident in a perfectly-smooth, evenly-roasted cup each and every time. So , sip it slow or grab one on the go, enjoy it hot or over ice. We're here to make your day extraordinary.
