Ingredient Highlights

Dicalcium Phosphate Dihydrate: A mild abrasive that helps remove plaque and surface stains from teeth.

Sorbitol: A sugar alcohol that adds sweetness to the toothpaste without causing tooth decay. It also helps maintain moisture.

Hydrated Silica: Another abrasive that aids in removing plaque and stains. It's gentle on the teeth.

Charcoal Powder (Bamboo Charcoal): Known for its absorbent properties, charcoal can help absorb impurities and stains on the teeth. It's often used for its potential teeth-whitening benefits.

Sodium Lauryl Sulfate: A foaming agent that helps distribute the toothpaste evenly and reach all areas of the mouth. It also aids in the removal of debris.

Cellulose Gum: A thickener that contributes to the toothpaste's texture and helps stabilize the formula.

Menthol: Adds a cool and minty flavor to the toothpaste, providing a fresh feeling after brushing. It may also have mild antibacterial properties.

Sodium Benzoate: A preservative that helps prevent the growth of bacteria and fungi in the toothpaste.
